A grown man who tries to mend a mud hole in the public road with uncrushed stone ought to be indicted for obstructing the public highway. One price, figure to sell, and deliver who tries to mend a mud hole the next day? Or call up the on the public highway with dealer and find out if you can sand or top earth ought to be get a load of guano before comexempt from road tax for two ing to town after it. years. Any man who will mend a mud hole with sand or top of a frazzled wing buzzard, is fragrant compared to a yawning, hungry mud hole.

Carmack being dead vet speaketh. The deep damnation of his taking off has set the of his taking off has set the mark of Cain upon the brow of the Coopers. Guilty of murder the Coopers. Guilty of murder Headache and Indigestion. 25c at all in the second degree with twen- Druggists. ty years of impriment to atone for the foul blot their pride and passion put on Tenmeesee. Good for the illiterate, ignorant jury. Not as ignorant as some supposed. If ignorant of what it ought to do, then truly, was Mr. Dupre, Owens Station, it folly to be wise. The verdict | Laurens County, at the age of was a great surprise to many. So much unjust criticism has been flung at juries by the newspapers, that few people exgreat relief to have the curtain Laurens county; Mrs. Mary rung down on such a tragedy.

Rural Telephone Lines.

connections wherever there is an conducted by Rev. B. P. Reid. exchange. The tolls are very reasonable, the lines are nominal in price of construction and the 'phones are cheap. For a double-wire line the wire costs about \$13 per mile and phones \$13.50 each. On the basis of a double-wire line with ten subscribers, the line being seven miles long, the cost would be about \$25 per 'phone. This is exclusive of the poles, which can be gotten out of the woods hereabouts very cheaply and the erection of the wire. The poles are set about 13 to the mile, and you can figure out this cost for yourself. On a line length of above there should be at least 20 subscribers, which would bring the price down, per phone, considerably. After you once get the service there would be no kick on the cost of the line.

The Farmers Line movement in this section is developing much activity. A contract has been closed by the "Flat Rock Telephone Co." to be connected with the Liberty exchange, and the line is being rapidly pushed to completion.

The securing of this line is the result of activity on the part of the farmers and rural residents of this section in the matter of securing telephone service in their homes.

This development is of particular interest and advantage to the merchants, business men and other residents of Liberty, Easley and Pickens, enabling them to reach people, who, otherwise, would be unable to transact business at these points, nected with this line are Messrs. T. L. Watkins, J. C. McKinney, E. F. Allgood, G. W. Russell and N. S. Reeve all of whom are inches wide, SOLD AT A PRICE TO MOVE IT. prominent farmers of that community.

The Pumpkintown Telephone

Pickens Sentinel-Journal Co. has got its wires strung all the way to Pickens and connection with the central office has been made. You can now talk to Pumpkintown and the line Table Rock hotel this summer.

Pickens to Six Mile. This is being agitated and worked up and that the "Six Mile Telephone Co." has signed a contract for a line. This is one of the most important sections in the county for a line and one should be built by all means

We want to talk to you a little now but what the Rhode Island Red about our ammoniated fertilizers. The They gently stimulate stomach, liver fowls are the most talked of acid and meal season is about over. fowls of the day, and the com- Those who use acid and meal haul it home early in the season so that they can mix it, The season for ammoni ated goods commence later, and in Poultry raisers are on the fact, is about started now. There is lookout for good fowls and are not much difference in acids; one acid quick to see winning points of is about as good as another. It is all the various breeds. There are made of phosphate rock, (bone phosquite a number of Reds in this phate lime,) crushed and treated with community and doubtless they sulphuric acid phosphate and one fertilizer company turns out about as good quality of this goods as another. The difference in fertilizer is in ammoniated goods. Ammoniated goods are made by taking this same acid phosphate and mixing it with ammoniates, blood tankage, nitrate of soda, cotton seed meal, sulphate of ammonia, garbage. Now; some of these ammoniates do their work and exhaust more quickly than others and so by properly mixing and manupulating our accmoniates, we have gotton a fertilizer that will nourish the plant from the time it sprouts, all during the growing season, during the laying-by season WHEREAS, Elizebeth A. Lindsey made and up to the time the plant is masuit to me, to grant her letters of Ad- tured and ready to be gathered. Take Company is doing all it can to late Thomas G. Boggs, of Liber- ministration of the estate and effects of for instance nitrate of soda. It acts quickly and exhausts. Cotion seed meal will come in next; it will disfore it becomes a plant food, just as when you plant a grain of corn it has and are also helping the farmers most lovable charactor, having at Pickens on the 25 day of March to germinate before it comes up. Tankto get in closer touch with their great personal magnetism, en- 11 o'clock in the forenoon, to show cause age come in next and then blood; which lasts until the crop is matured and ready to be gathered. So by taking the different kinds of ammoniates in the proper proportion, one coming in as one exhausts, we have a fertilizer that will feed and nourish the plant from the time it sprouts until it is ready to be gathered. That is a complete fertilizer and unless it does that it is not a complete fertilizer. It does not matter where you get it, it is not a complete fertilizer unless it feeds and nourishes the plant from the time it sprouts until the crop is State of south Carolina, ready to be gathered. These ammoniates are very expensive, that is why ammoniated goods cost more than of the General Assembly of this State, acids. Take sulphate of ammonia; it approved costs \$61 per ton laid down at the will sell to the ghest bidder at Pickens, factory. We have bought qui.e a lot next being the 5th day, at 11 o'clock, at of this and are using it in fertilizers that will sell for less than \$30 per ton, just because we want to make the right kind of goods; goods that will make the crop grow and keep growing and will make a man take a pride in and will make a man take a pride in the follows the same being a part of the court House Square, as follows: Lot No. 1 fronting on Main Street 35 fit think I put water in it, fact is good oil like mine wont mix with water, try it some time.

Making More Money Out of Cotton Crops

is merely a question of using enough of the right kind of fertilizers.

Virginia-Carolina **Fertilizers**

re the right kind.

The cotton plant cannot feed on barren land. Study your soil. Find out what it lacks. Then apply the necessary fertilization and the results will surprise you.

See what Mr. W. C. Hays of Smith Station, Ala., did. He says: "I planted about 30 acres of some 'gray sandy land' that had been in cultivation for over 20 years, and used 300 pounds of Virginia-Carolina Fertilizers per acre, and I expect to gather 30 bales from the 30 acres." This is why we say it is the right kind. We have This is why we say it is the right kind. We have hundreds of letters like this, and even stronger, in praise of Virginia-Carolina Fertilizer for cotton.

Get a copy of the new 1909 Virginia-Carolina Farmers' Year Book from your fertilizer dealer, or write our nearest sales office and a copy will be sent you free. It contains pictures of the capitols of all the
